A WORLD IN MOTION®

The A World in Motion® curriculum joins together teachers, students, and industry volunteers in an exploration of physical science while addressing essential mathematic and scientific concepts and skills. Industry volunteers play an essential role in motivating the next generation to pursue careers in science, technology, engineering and math by bringing their everyday experiences into an AWIM classroom..

MTTP is an event organized to train the participating college volunteers and school teachers so that they can further train the school students. It's aim is to make them aware of the rules and regulations of the competition..

Training & Fabrication of Toys

After the introductory session, the teachers as well as the volunteers were taken for training - the fabrication of the jet-toy and skimmer respectively.

The training started with the introduction of the trainers- Ms. Harshita and Mr. Sanjay Khan for jet-toy and Ms. Megha Gupta and Mr. Dikshaant for skimmer.

After the introduction, teams were formed, which included volunteers as well as teachers, so as to provide a real life experience of the competition in order to make them aware of the problems that the students might face as well as their requirements.

Each team had its own test engineer, project engineer and facility engineer and each team fabricated two vehicles one for the track phase and the other for the presentation phase of the event.

Testing of Toys

After Fabrication, the teams proceeded for the track stage of the event where skimmer and jet-toy vehicles were tested respectively.

The testing was equally competing during the training session as would have been in the actual competition and on the other hand, in the presentation round the teachers and volunteers came with totally different and innovative ideas for the promotion of their vehicle like satellite, kneel on wheels, solar energy, etc. and it seemed each one of them had stepped into the shoes of a school student.

The volunteers and teachers enjoyed the training session thoroughly and even appreciated the knowledge they gained.

KITS DISTRIBUTION & FEEDBACK

CONCLUSION

- The volunteers as well as teachers enjoyed a lot.
- Everyone had a new learning experience.
- The teachers were pretty enthusiastic about the regionals and learned something new at their level.
- They all presented their innovative ideas making MTTP a success.
