

# PRESENTS

## WEBINAR ON HOLISTIC AUTOMOTIVE CYBERSECURITY

13<sup>th</sup> August 2021 | 05:00PM – 7:00PM

### SPEAKERS

**Mr. ANOOP BHAT**  
Executive VP - MSIL  
Engineering

**Mr. ALOK JAITLEY**  
Sr. VP - MSIL  
Engineering

**Mr. KHUSHWANT PAWAR**  
HEAD, CYBERSECURITY  
ETAS - ESCRYPT

### ABOUT THE WEBINAR

Vehicle development – and ECU development in particular – has undergone tremendous changes in recent years, especially concerning emergent mobility topics. Securing an ECU and a complete vehicle, however, demands a holistic approach. Hence, a correct configuration of the security modules is mandatory, This webinar gives an overview of the security mechanisms and how the security modules should be integrated into the Software Engineering Process. In addition, you will learn which measures are required in order to secure the vehicle network holistically.

### KEY TAKE AWAYS

- Awareness of automotive cybersecurity
- Considerations for implementing automotive cybersecurity
- Regulations and standards
- Summary

### SUPPORTING PARTNERS

**SECURITY. TRUST. SUCCESS.**
